# General Information

## Venue

International Conference Center of Tehran Milad Tower, Tehran, Iran

## Organizer

37th Iranian Congress of Radiology (ICR 2022) is organized by the Iranian Society of Radiology.

## Date

July 19-22, 2022

## Language

The language of the congress is English and Persian

Secretariat Registration

Registration fee includes: 5000,000 Rial

- Admission to scientific sessions and commercial exhibition

## Scientific Program Secretarial

Assistance and information regarding the scientific program will be provided by secretariat at conference center lobby.

## Speaker Ready Room

The slide preview room is located in lobby at the east (left) side of the main hall. Lecturers are requested to submit their presentations at least 30 minutes before their session. The presentation should be in Power Point 2003 format. The files should be in portable media format supplied in flash-disk or CD.

## VIP Room

The VIP room (Molavi Hall) is available for all ICR2022 speakers on -1/B1 floor at Conference Center.

## Electronic Posters

This year we only accept posters in electronic format. All posters should be prepared in PowerPoint 2016 format similar to a regular lecture presentation but with more description to let them be used stand-alone. Posters will be displayed in a specific site at lobby on several workstations.

## Congress Badge

Participants are requested to always wear their badges. The badges contain a bar-code which will be used for registering your entrance into the halls and also restaurants.

## Workshop Registration

Workshops need separate registration. workshop schedule will be available at [www.37.icrad.ir](http://www.37.icrad.ir)

## Meals

Coffee break will be available daily at 10:30-11:00, 16:00-16:30 and lunch at 13:00-14:00.

## Technical Exhibition

A technical exhibition will take place at the Conference Center, sufficient time during intermissions is reserved for visiting the booths of leading sponsors (Medical Engineering Companies), which present their latest achievements and give you ample expert information.

## Society Booth

The Iranian Society of Radiology booth is located on ground floor. Application forms and general information for membership are available. It provides membership services, information and an opportunity to pay annual dues for the society.

Welcome Message

### Welcome message-ISR President\*

Dear Colleagues and distinguished guests, welcome to the 37th ICR! I am cordially glad to make the acquaintance of all of you in here after 3 years of virtual congresses and Corona lock down.

Although during the past 3 years our society has pioneered in web based academic programs and vocational training schemes through its various scientific committees and faculty, the merits of a real congress and its potential to cover various aspects of the science of imaging is now appreciated. I take this opportunity to thank all members of the Iranian Society of Radiology for their devoted and relentless service in the diagnosis and treatment of patients during the pandemic which genuinely reflected the level of professional commitment among our colleague's radiologists, and technologists included.

Our thoughts with our lost colleagues in the past year (Prof. Akbar Bonakdarpour, Prof. Saeed Rad, Dr. Shahram Kahkoei, Prof. Javad Jannati) and our tribute to their outstanding contributions in our previous scientific events. I also feel most obliged about the martyrs of our healthcare system (especially radiologists) who made the ultimate sacrifice in the line of duty during the COVID outbreak.

I am honored to have Prof. Radmard as the president of the present congress who works with a panel of most renowned faculty as members of our scientific committees to make our congress as fruitful as possible.

We have endeavored to cover mainstream educational needs of radiologists in all aspects of this discipline as well as the latest information on Artificial Intelligence and legal issues related to digital imaging

I hope you find the academic and nonacademic programs of this congress satisfying and I welcome your feedbacks or points of view on educational and professional issues during the congress.

## Amir Reza Radmard, MD

President of  
the 37th Iranian Congress of Radiology  
(ICR 2022)

Dear colleagues,

It is my great honor to invite you to the 37th Iranian Congress of Radiology (ICR 2022) to be held on July 19-22, 2022, in Tehran, Iran.

Although the pandemic crisis had a negative impact on all of us, it demonstrated the strength of our society. We not only did not give up but stayed united in support of each other to fight at the forefront against the pandemic. While the tremendous impact of the COVID-19 crisis made our society cancel the face-to-face meetings in 2020 and 2021, we, like many other international meetings, planned to set up an in-person congress again featuring onsite activities from the world of medical imaging.

Following more than three decades of experience, the 37th annual ICR is planned to cover all different aspects of radiology, including four main themes of Abdominal Imaging, Breast Imaging, Artificial Intelligence, and Interventional Radiology, to offer a comprehensive program on the latest innovations in imaging and treatment to the medical imaging professionals. Radiology has witnessed impressive advancements in Iran over the past years. Currently, it is contributing to a wide spectrum of services from screening and early diagnosis to advanced patient management and treatment. The scientific committee of ICR 2022 is preparing a rich program that participants can fully engage and be part of the learning. In line with the latest updates in the scientific program, some new sessions and features will be launched in the congress including "Young ICR", and "Jeopardy Quiz" which will greatly attract the participants in an interactive and motivating multidisciplinary environment.

Once again, the congress venue will be the International Convention Center at Milad Tower, Tehran, as one of famous Iran's landmarks. The health and well-being of our guests, registrants, and staff is our top priority; therefore, we will, of course, monitor the COVID-19 situation closely and follow all government-recommended quarantine guidelines.

I am confident that the ICR 2022 will provide excellent opportunities for the participants to meet other colleagues and learn, interact and engage with speakers and industry representatives. I am very much looking forward to welcoming you and wishing you a wonderful experience at ICR 2022 in Tehran.

Sincerely,

Amir Reza Radmard, MD  
President of ICR 2022

## Habib Mazaher, MD

Honorary President,  
37th Iranian Congress of Radiology

After a long period of the covid-19 pandemic and worldwide restrictions, I am glad to see you again in ICR37.

It's my honor to welcome you, dear speakers and participants, to this congress, either in conference halls, or through the world with the assistance of web based programs.

Rapid advancements of radiology sciences in recent decades, lead us to more vigorous effort and practice to maintain our knowledge and gain new information. Here, the 37th Iranian congress of radiology is a good opportunity for these purposes. The last advances in abdominal imaging, breast imaging, artificial intelligence and interventional radiology are reviewed with more detail. Other fields in radiology also have valuable lectures and workshops during the congress.

I should announce my gratitude to dear Dr. Radmard, the president of the congress and also to the scientific and executive committees, the wise lecturers in every field and everyone involved in the execution of this congress.

## Morteza Afra

President of the Iranian Association of Radiographic Sciences

Dear Colleagues

Welcome to 19th Iranian congress of Radiographic Sciences Association.

On behalf of the President of IRSA, please accept my best wishes for this scientific, informative and enjoyable event.

The medical world has made great strides in the last decade, and imaging has always played a major role in these advances.

Following the outbreak of the Covid-19 corona virus, the important role of imaging (especially CT scan, as the best way to diagnose the disease) was clearly identified. IRSA and the Scientific Committee of the Nineteenth Congress, in spite of this epidemic and the existing limitations, have made every effort to increase the knowledge of radio professionals and to share the capabilities of their colleagues. Diagnostic radiography is an art and science in which many sub-disciplines are being developed, and radiotechnologists, as a qualified and reliable diagnostic radiograph, must have the necessary information from all the different methods and tools in the field of medical imaging. To be.

Through this conference, we want to engage with all of you in a constructive discussion about the effective and undeniable role of medical imaging in the diagnosis and treatment of diseases. Thus, the Scientific Committee of the Congress, with great effort and care, reviewed the submitted papers and shared the best of them in separate sections such as articles, lectures and posters, which I hope will be useful to all participants.

I would like to thank Dr. Morteza Sanei Taheri, President of ISR, for all the cooperation of the two associations in holding the Congress. The IRSA and ISR Scientific Committees have made great efforts to improve the scientific level of Congress, and it is commendable.

I congratulate you on your commitment and active participation and wish you all success.

## Mohamad Akbarnejad, MS

Director, 19th Iranian congress of Radiographic Science Association

Dear colleagues,

As the president and scientific secretary of the conference, I am pleased and honor to welcome you to the 19th congress of Radiographic sciences.

At this congress there has been an attempt to educate and improve relative techniques and various test approaches to imaging in order to develop the knowledge and capabilities of colleagues.

Moreover, having considered the rapid pace of growth and evolutions in the field of medical imaging and the need for acquaintance with modality, technique and new applications, the latest guidelines to recent radiography worldwide will be introduced.

Therefore, the Congress has gathered a team of the best medical imaging physicists and applicator specialists along with the country's top-notch radiography experts to represent talks and judging the presented articles.

The congress mainly deals with Abdominal and Breast Imaging, vascular and Interventional Radiology, and Artificial intelligence in Radiology, with particular focus on establishment and innovative performance in Medical imaging for to achieve the best diagnosis

## Hall # V

### Session H&N I (Paranasal Sinuses)

Chairs:

- Hashem Sharifian
- Mohammad Ali Kazemi

08:30 Red Flags in Reporting of PNS CT Scan  
• Maryam Mohammadzadeh

09:00 Panel: Fungal Infections: Which Points to Report?

Moderator:

- Mohammad Ali Kazemi (Radiologist)

- Mehrdad Hasibi (Infectious disease specialist)
- Shirin Irani (ENT Surgeon)

10:00 Key Points of Reporting in Post PNS Surgeries  
• Hashem Sharifian

10:30-11:00 *Coffee Break*

### Session AI I: The basic

Chairs:

- Mansoor Fatehi
- Ashkan Sami

11:00 AI, Human Computer Interaction  
• Zohreh Azimifar

11:30 How Clinical Data Can be Prepared for AI Research and Development?  
• Mansoor Fatehi

12:00 From Data to Deployable AI-based Systems in Radiology  
• Ashkan Sami

12:30 Why AI Is Harder Than We Think  
• Alireza Shakibafard

13:00-14:00 *Lunch*

### Session Neuro II

Chairs:

- Ali Hekmatnia
- Reza Bakhshandehpour
- Dayan Amanian
- Rouzbeh Shams Amiri

14:00 Anatomy and Nomenclature of Cervical and Lumbar Degenerative Disease  
• Fatemeh Hosseinabadi

14:20 Important Features of Mechanical Instability and Facet Degeneration  
• Reza Bakhshandehpour

14:45 Focus on Spinal Stenosis  
• Farnaz Godazandeh

15:05 Alarm Features in Routine Spine Images; Do Not Neglect Concurrent Infection or Tumor, A Case Discussion Presentation  
• Soheila Borji

15:25 What a Neurosurgeon Wants in Spine Imaging Reports  
• Rouzbeh Shams Amiri

## Hall # VII

### Session Intervention I (Neurointervention: Embolization)

Chair:

- Hossein Ghanaati

08:30 Different Between Phill and Onyx in Treatment of AVM  
• Rambod Salouti

08:50 Dural AVF  
• Mohammad Gharib Salehi

09:10 Endovascular Treatment of Central Aneurysm of Brain  
• Hossein Ghanaati

09:30 Endovascular Treatment of AVMs  
• Ramin Pourghorban

09:50 Q&A

10:30-11:00 *Coffee Break*

### Session Intervention II (Neurointervention: Strictures & Stenting)

Chair:

- Rambod Salouti

11:00 Cervical Carotid  
• Mohammad Reza Ahrabi

11:20 Intracranial Stent  
• Rambod Salouti

11:40 Vertebral Artery + Steal Syndrome  
• Mohammad Reza Ahrabi

12:00	Ischemic Stroke (Role of IR) • Mohammad Gharib Salehi
-------	--

12:20	Q&A
-------	-----

**13:00-14:00 Lunch**

**Session Intervention III (Head and Neck Interventions)**

Chair:

- Hojjat Ebrahimi Nik

14:00	FNA and Biopsy: Indications-method • Farzad Moradhaseli
-------	--

14:20	Parathyroid Tumors: Ablation of Metastatic L.N • Hossein Chegini
-------	---

14:40	Embolization of Head and Neck Tumors • Mohammad Reza Sasani
-------	--

15:00	Cystic Thyroid Lesions: Approach– Treatment • Hossein Chegini
-------	--

15:20	Thyroid RF Ablation: Indication, Method, Outcome • Hojjat Ebrahimi Nik
-------	---

15:40	Q&A
-------	-----

**Session Intervention IV (Cardiothoracic IR)**

Chair:

- Shahram Akhlaghpour

16:00	Bronchial Artery: Hemoptesis • Ramin Pourghorban
-------	---

16:10	Pulmonary Artery: AVM, AML. Embolization • Hamid Mojibian
-------	--

16:20	SVC Syndrome • Kiara Rezaei Kalantari
-------	--

16:30	Lung Biopsy • Mohammad Momen Gharibvand
-------	--

16:40	Lung Nodule Ablation • Bitra Abbasi
-------	--

16:50	Management of the Pulmonary Thromboembolism • Hamid Mojibian
-------	---

## Hall # VIP

**Session Vendor Workshop (Takvin Teb)**

11:00	Next Step Evaluation in Presence of Soft Markers in Anomaly Scan • Kourosh Shahsavan
-------	---

**13:00-14:00 Lunch**

**Session Workshop (Tajhiz Gostareh Sina)**

14:00	Liver Mass • Faeze Salahshour
-------	----------------------------------

## -2 Floor, Poster Exhibition Site

**Session # Quiz of the Day**

Head:

- Fariba Hashemi

Moderators:

- Sepehr Haghighi
- Ghazaleh Jamalipour Soofi

**Abstract**

**Objective:** Performing shear wave imaging is simple, but can be difficult when inflammation, jaundice, and congestion are present. Therefore, the correct diagnosis of liver fibrosis using shear wave imaging alone might be difficult in mild to-moderate fibrosis cases. Strain imaging can diagnose liver fibrosis without the influence

Fujifilm Healthcare

can diagnose liver fibrosis without the influence of inflammation. Therefore, the combined use of strain and shear wave imaging (combinational elastography) for cases without jaundice and congestion might be useful for evaluating fibrosis and inflammation. **Conclusions:** The combined use of strain and shear wave imaging (combinational elastography) might increase the positive diagnosis of liver fibrosis and inflammation.

**"DeepInsight: noise reduction technology for ultrasound systems"**

(DeepInsight is a registered trademark or a trademark of FUJIFILM Healthcare Corporation in Japan and other countries.)

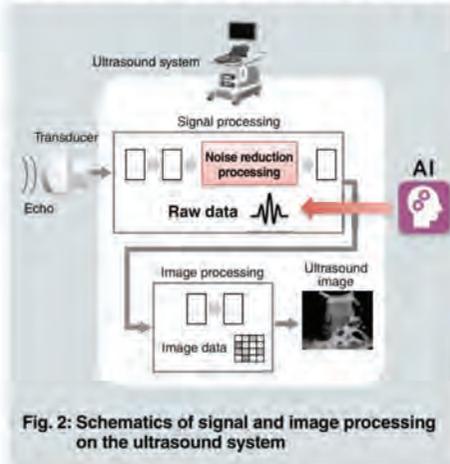

Fig. 2: Schematics of signal and image processing on the ultrasound system

Fujifilm Healthcare

FUJIFILM Healthcare Corporation has developed a noise reduction technology named *DeepInsight* that significantly improves the quality of images produced by ultrasound systems. This technique uses AI to distinguish between echo signals and noise, and selectively extracts the signals necessary for diagnosis. This enables ultrasound systems to provide high-quality images even from deep regions of the body that have been difficult to examine due to the weak received signals, thereby supporting more accurate ultrasound examinations. *DeepInsight* is a technology based on AI that can effectively reduce unnecessary electrical noise from echo signals while improving the basic performance required for ultrasound images. This enabled to obtain clearer images of the shape and dynamics of tissues deep

inside the body, where they used to be blurred by noise. In the future, we will seek to the early release of a product supporting this technology in cooperation with medical institutions, and we will contribute to the realization of more accurate ultrasound examinations.

**Abstract:** AIM: To evaluate the usefulness of real-time virtual sonography (RVS) in biliary and pancreatic diseases. **CONCLUSION:** RVS has potential usefulness in objective visualization and diagnosis in the field of biliary and pancreatic diseases.

ULTRAFAST™ INTELLIGENCE

**UltraFast Imaging**: قابلیت تصویربرداری بسیار سریع با سرعت ۲۰,۰۰۰ فریم در ثانیه که باعث افزایش رزولوشن شده و تصاویر با کیفیت و دقت بالایی را ارائه می کند.

**UltraFast Doppler**: دستگاه دارای سرعت و حساسیت بسیار بالا در داپلر می باشد که کلیه اطلاعات تصاویر و داپلر را در فاصله زمانی ۲ تا ۴ ثانیه دریافت نموده و امکان بازیابی تصاویر و اطلاعات داپلر را پس از فریز کردن تصاویر، در سه نقطه مجزا بصورت همزمان به همراه اندازه گیری های دقیق سرعت خون فراهم می سازد.

**2D Real Time ShearWaveElastography**: الاستوگرافی شیروبو منحصر بفرد سوپرسونیک در تمامی پروب ها فعال بوده که تنها الاستوگرافی دقیق و قابل اعتماد و دارای تاییدیه آمریکا می باشد که امکان بررسی کلیه توده ها از قبیل توده های پستان، تیروئید، پروستات و کبد را فراهم می کند و همچنین دارای الاستوگرافی جهت بررسی عضلات، عصب و تاندونها (MSK) نیز می باشد.

**Liver Fibrosis Assessment**: دستگاه دارای دقیق ترین ابزار جهت بررسی فیبروز کبد، با قابلیت نمایش *Real Time* و اندازه گیری بصورت کمی و کیفی بوده و همچنین دارای پارامترهای اندازه گیری و تشخیص گرید کبد چرب بصورت کمی نیز می باشد.

**AngioPLUS**: جدیدترین تکنیک تصویربرداری در آشکارسازی و نمایش عروق بسیار ریز با جریان و سرعت پایین بوده و امکان نمایش *MicroVascular Flow* در شکم و بافت های سطحی را فراهم می سازد که امکان بررسی خون رسانی توده های مختلف را به کاربر می دهد.

**TriVu**: قابلیت تصویربرداری و نمایش همزمان سه مد: 2D، الاستوگرافی *ShearWave* و *Color* که امکان بررسی همزمان *Stiffness* و خون رسانی بافت و توده های مختلف را فراهم می سازد.

**Image Quality**: مشاهده بیشترین جزئیات آناتومیکی در سونوگرافی بارداری، زنان، *MSK*، شکم، لگن، تیروئید، اندام، کبد، کلیه و *General* با بهره مندی از تکنولوژی *Single Crystal* در ساخت پروب و نیز نرم افزارهای پیشرفته جهت پردازش تصویر در دو حالت *Real Time* و *Post Processing*
