

Session	Time	Speaker	Title
Scientific Session1 IR, Thoracic Imaging	16:00-16:13	Mehrdad Bakhshayeshkaram	Imaging Findings in Patients with the New Swine Flu Influenza A (H1N1) infection
	16:14-16:27	Wiwat Owasirikul	Function for Predicting Shape Diameter of Embolized Coils in Intracranial Aneurysm Treatment
	16:28-16:41	Morteza Sanei Taheri	Presentation of Iran radiology site
	16:42-16:55	Mohammad Davoodi	Accuracy Of Percutaneous Multislice Ct-Guided Needle Biopsy Of Small Pulmonary Nodules On Expiratory Phase
	16:56-17:09	Hadi Zomorrodian	Clinical efficiency of interventional radiological therapy in the treatment of obstructed hemodialysis shunts
	17:10-17:23	Henry Chan	Modified Radiologic-guided Percutaneous Gastrostomy (MRPG) in Patients with Complete Obstruction of the Upper Digestive Tract Without Endoscopic or Nasogastric Access
	17:24-17:37	Mehrdad Bakhshayeshkaram	Pulmonary Manifestation of HIV patients with Tuberculosis
	17:38-17:51	Morteza Sanei Taheri	Evaluation of correlation between angiographic and skin findings in patients with vascular (arterial) disease who referred to the radiologic ward of Shohada hospital
	17:52-18:05	Henry Chan	Percutaneous Computed Tomography-Guided Cryotherapy of Thoracic Masses in Nonsurgical Candidates
Scientific Session 2 MSK, CV, IT, Ped	16:00-16:13	Abas Hajjafari	Practical techniques to reduce susceptibility artifact in patients with metallic implants
	16:14-16:27	Elham Keshavarz	Multifidus fat infiltration and abnormal imaging findings: MRI review
	16:28-16:41	Mohammad Hossein Herischi	Image guided clinical correlation of CDH and C.L perthes disease
	16:42-16:55	Safa Hoodeshenas	Evaluation of correlation between myocardial bridging and atherosclerotic changes in coronary artery segment proximal to the bridge by 64-slice multidetector CTscan
	16:56-17:09	Mohammad Bodaghabadi	Diagnostic Accuracy of Sixty four Multi-slice CT Angiography in assessment of Arterial Cut-off and Run-off in comparison with surgical findings as Standard of Reference
	17:10-17:23	Amir Hossein Saveh	The Knee Kinematics Based On 2D-To- 3D Registration of Fluoroscopic and Angiographic Images
	17:24-17:37	Farideh Gharekhanloo	Comparison of allergic adverse effect and contrast enhancement of iodixanol (visipaque) and iopromide (ultravist)
	17:38-17:51	Nasrin Nooshfar	Black, white and grey
	17:52-18:05	Shahram Kahkooie	Quantitative evaluation of HRCT changes in advanced CF patients based on brody scoring (revised 2006) in Masih Daneshvary Hospital from 2006-2009

Session	Time	Speaker	Title
Scientific Session 3 Neuro, H&N	16:00-16:13	Andrzej Urbanik	Plastic changes in the functional brain organisation induced by forced right- handedness - fMRI study
	16:14-16:27	Amirhossein Ghazavi	Volume of plaques is a more accurate Magnetic Resonance Imaging criterion for multiple sclerosis response to treatment than number of plaques; although number of plaques can be an accurate criterion, if a new cut-off is considered
	16:28-16:41	Saeed Naghibi	The correlation between corpus callosum index (CCI) in MRI and severity of Multiple sclerosis
	16:42-16:55	Andrzej Urbanik	fMRI in localization of language areas in bilinguals
	16:56-17:09	Saeed Naghibi	Determination of the cerebellar tonsillar position and it's relation with neurological symptoms
	17:10-17:23	Parvaneh Layegh	Correlation of sonographic findings with thyroid function and autoimmune activity in patients with vitiligo
	17:24-17:37	Maryam Mashayekhi	MRI Findings in Posterior reversible encephalopathy syndrome (a case series)
	17:38-17:51	Kimia Kahrizi	Neuroimaging aspect of Hereditary Mental Retardation associated with congenital brain malformation
	17:52-18:05	Masume Johari	Comparison of ultrasonography with computed tomography in the detection of zygomatic arch fractures
Scientific Session 4 Women, Misc	16:00-16:13	Amirhossein Hashemi Attar	The Normal values of Nuchal Translucency based on CRL in Iranian fetuses between 11-14 weeks
	16:14-16:27	Morteza Tahmasebi	Comparing of transvaginal ultrasonography results with Dilatation and Curettage findings in evaluation of endometrial cancer in women with postmenopausal bleeding
	16:28-16:41	Maryam Barzin	Doppler assessment of uterine blood flow in recurrent pregnancy loss
	16:42-16:55	Morteza Sanei Taheri	MRI evaluation of ultrasonographically indeterminate pelvic mass
	16:56-17:09	Siamak Sabzevari	Evaluation of radiographic repeat rate data and film reject analysis of radiology departments in several hospitals of Hamadan university of Medical Sciences
	17:10-17:23	Morteza Tahmasebi	Safe cervical length during pregnancy evaluated by endovaginalsonogrphy
	17:24-17:37	Morteza Sanei Taheri	Evaluation of correlation of uterine artery impedance parameters with amniotic fluid
	17:38-17:51	Saeed Naghibi	The value of Chest X-ray in neonate with respiratory distress syndrome
	17:52-18:05		

Session	Time	Speaker	Title
Scientific Session 5 Body	16:00-16:13	Ali Hekmatnia	The value of Magnetic Resonance Cholangiopancreatography in bile duct abnormalities and comparison with Endoscopic retrograde Cholangiopancreatography
	16:14-16:27	Karim Ghazikanlou Sani	A comparison of the efficacy of castor oil and Senagroph herbal extract in patient's bowel preparation
	16:28-16:41	Mohamad Hosein Alamolhodaee	Comparison of resistive index in the live kidney donors before and after nephrectomy
	16:42-16:55	Ali Reza Zahiri	The Accuracy of Virtual Magnetic Resonance Cystoscopy in Detection of Ureterocele
	16:56-17:09	Nargess Afzali	CT guided needle biopsies in pulmonary nodules
	17:10-17:23	Mehrdad Bakhshayeshkaram	Pulmonary manifestation of HIN1 influenza in patients in intensive care unit
	17:24-17:37	Morteza Tahmasebi	Evaluation of relation between Risk of Incompetence cervix and maternal age in pregnancy
	17:38-17:51	Nargess Afzali	CT guided needle biopsies in mediastinal lesions
	17:52-18:05	Maryam Moradi	The accuracy of target sonography in evaluation of palpable breast mass
Scientific Session 6 Neuro, H&N	16:00-16:13	Saeed Naghibi	The value of Brain CT scan in patients with headache
	16:14-16:27	Morteza Sanei Taheri	The Utility of In-Phase/Opposed-Phase and DW Imaging in Differentiating Malignant from Benign vertebral lesions
	16:28-16:41	Ali Hekmatnia	CTangiography can be a more useful modality than digital subtractational angiography in diagnosis of Patients with subarachnoid hemorrhage due to cerebral aneurysms
	16:42-16:55	Siamak Sabzevari	Quality control of safelight condition in darkrooms of radiology departments in hospitals of Hamadan city
	16:56-17:09	Morteza Sanei Taheri	Failed Back Surgery Syndrom
	17:10-17:23	Saeed Naghibi	The comparison of results of ultrasound and FNA in thyroid nodules
	17:24-17:37	Leila Agha Ghazvini	Frequency of abnormal findings in lumbar MRI in patients who referred to Imam Khomeini hospital with low back pain
	17:38-17:51	Morteza Joorabian	Endovascular Treatment of Intracranial Arteriovenous Malformations at DamascusUniversity
	17:52-18:05
